

AT SUMNER VET WE HELP **YOUR PET** **LIVE ITS BEST LIFE.**

If your pet is suffering from an injury or illness related to the neurologic and musculoskeletal systems, physical rehabilitation can be extremely beneficial.

Rehabilitation services are vital to ensuring that your pet can eventually regain their comfortability in order to live a happy and healthy life. We can create and implement a rehabilitation plan for your pet to help them recover from an injury, manage a condition, and increase mobility which ultimately improves your pet's quality of life.

ALL ABOUT REHABILITATION SERVICES FOR YOUR PET

Why would my pet need rehabilitation?

Most pet owners decide that veterinary rehabilitation is necessary for their pet after an injury or to manage their pet's chronic health condition. It is important to note, however, that your pet does not need to be in any immediate pain to consider the benefits of rehabilitation services. Rehabilitation has been particularly useful in reducing and managing pain, improving athletic performance, treating injury, reducing the risk of further injury, restoring and maintaining movement and mobility, as well as improving the overall daily functions of your pet.

How does rehabilitation work?

Based on the condition of your pet, our experienced Rehabilitation Team will create and implement a treatment plan to restore mobility and ease any pain your pet may be feeling.

We offer a wide variety of Holistic & Traditional rehabilitation services including:

- Thermotherapy
- Treadmill work
- Electrode stimulation
- Exercise programs
- Massage
- Hydrotherapy
- Kinesiology taping
- Splinting
- Drug therapy
- Acupuncture
- Laser therapy
- Therapeutic ultrasound
- Joint mobilization
- Spinal manipulative therapy
- Orthotics, prosthetics, or assistive devices
- Trigger point therapy
- Synovetin OA injections

As your pet progresses, our team will keep careful records and make any necessary adjustments to ensure the rehabilitation process is successful. Pain medications can also be prescribed if necessary. With advanced equipment

and progressive methodology, we dedicate ourselves to providing the best possible rehabilitation service for your dog, cat, or other animals. Every test, decision, and treatment is customized to the specific needs of your pet so that they can manage their condition or recovery and live out their happy, healthy life.

When should I consider rehabilitation for my pet?

If your pet is suffering from pain due to an injury or chronic health condition, rehabilitation may be the answer. Although pain-related symptoms are the most common indicators of a need for rehabilitation, if your pet is not living as comfortably as they could be, rehabilitation should be considered.
